## Seasonality of sales:

The seasonality of sales and inventories of the AmRest Group is not significant which is typical for the whole restaurant industry. On Central and East European markets, restaurants have lower sales in the first half of the year which is mainly the result of a smaller number of days of sale in February and lower number of customers in the restaurants. The United States market is characterized by stronger first half versus second half sales performance. After a period of lower sales in the summer months and a slight revival related to the Christmas season, the first half of the year is a period of increased activity in connection with the use of holiday vouchers promotional coupons and a high number of holidays.

# Outlook

- Positive trends expected to continue in the current quarter
- La Tagliatella's international test is to continue
- Close to 100 openings making 2013 a record development year
